The long rows of two story plus attic, two bay wide brick houses with gable roofs built along this side of Hamburg St. by John S. Gittings in the 1840's and 1850's, are typical of the type of working class housing built in large numbers in this section of Federal Hill in this period. The houses were generally rented to a variety of tenants. Many of these houses have recently been renovated or are in the process of being renovated. 36 E. Hamburg St. is the one exception in the group, being only a two story, gable-roofed house. It was built, however, in the same period.

### DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This group of two story plus attic brick houses with gable roofs were built as a unit in the late 1840's by the same builder who constructed the adjoining rows on E. Hamburg St. and the rows on Wheeling St. encompassing 3-25 Wheeling St. 44 and 46 E. Hamburg have been covered with formstone.

The houses are two and a half stories in height, 14' (38,40) and 13' (42-46) wide, and occupy lots about 50 1/2' deep. The houses are two rooms deep and were originally built with one story high, two bay deep kitchen additions. These remain on some of the houses, have been replaced with modern structures on others, and are gone on still others. The houses are constructed in running bond, but 44 and 46 E. Hamburg have been covered with formstone. The low-pitched gable roof has a continuous two-tier brick cornice extending across the entire facade. Each house has a double rectangular chimney located along both its front and rear gable. The chimneys at 46 E. Hamburg are located along the eastern end of the house. 38-40 E. Hamburg and 42-44 E. Hamburg share paired, centrally located chimneys. These same pairs of houses also share a flat-roofed alleyway that runs between the two houses.

The first and second floor door and window openings of 38-40 E. Hamburg have segmentally arched brick lintels with scroll-sawed tympanums (though these have been replaced by solid wood tympanums at 38 E. Hamburg). The attic story windows have flat wood lintels and all of the sills are wood. At 42 E. Hamburg (and presumably also at 44-46 E. Hamburg) the door and window openings all have flat wood lintels and sills. As of this writing all of the houses except for 42 E. Hamburg have window openings filled with 1/1 double hung sash. The first and second floor window openings of 42 E. Hamburg are filled with new 6/6 sash and the attic story windows with new 3/3 sash. The houses have a mixed array of door types, though all have a narrow, rectangular single light transom (arched at 38-40 E. Hamburg). 38 and 40 E. Hamburg have late, six panel doors; 42 E. Hamburg has a modern six panel door; and 44 and 46 E. Hamburg have late panel doors with lights set within the door. The houses sit on fairly low basements, the entrances being reached by three stone or brick (42) steps. Each house has a rectangular coal opening located beneath the first floor window.
